PROFILE

Computer Science Engineering graduate specializing in Artificial Intelligence with hands-on experience in computer vision, machine learning, deep learning, and AI software development. Experienced in building end-to-end perception pipelines, training and integrating AI models, preprocessing datasets, and evaluating model performance using Python, PyTorch, and OpenCV. Strong foundation in C++, Java, Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Computer Networks, with an interest in high-performance AI and computing systems.

EDUCATION

Amrita Vishwa Vidyapeetham , Computer Science and Engineering - Artificial Intelligence, B.Tech CGPA – 8.08/ 10	2022 – 2026 Bengaluru
Christ Academy Junior College , CISCE - PCMC Percentage-95.25%	2020 – 2022 Bengaluru
Janak Academy , CISCE Percentage- 90%	2019 – 2020 Bengaluru

SKILLS

- **Technical Skills:** Programming: Python, Java, JavaScript, SQL
AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision, NLP
AI Models & Frameworks: Vision Transformers, YOLO, EfficientNet, ResNet, LLMs, Agentic AI
Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Git, GitHub
Web & Backend: Flask, React.js, REST APIs, HTML, CSS
Databases: MySQL, Firebase
- **Soft Skills:** Analytical Problem Solving, Strong Written & Verbal Communication, Collaborative Teamwork, Adaptability, Learning Agility

PROJECTS

- **Adverse Weather Vision Pipeline for Autonomous Driving**
Python, PyTorch, ViT-B/16, FiLM-UNet, OpenCV, YOLOv11m
 - Built an end-to-end computer vision pipeline for autonomous driving under adverse weather conditions.
 - Integrated ViT-based weather classification, FiLM-UNet image restoration, and YOLOv11m object detection.
 - Evaluated image quality and detection performance using PSNR, SSIM, and detection metrics.
- **Computer Vision-Based Hand Gesture Recognition System**
Python, TensorFlow, OpenCV, MediaPipe, EfficientNetB0, Raspberry Pi, Arduino
 - Developed a real-time computer vision system for recognizing eight hand gestures for home automation.
 - Trained an EfficientNetB0 model with MediaPipe landmark tracking across varied environments.
 - Integrated Raspberry Pi and Arduino for gesture-based appliance control, using depth filtering and motion-based fallback for reliable interaction.
- **Disease Detection in Shrimps Using Deep Learning**
Python, ResNet50, LSTM, YOLO, Deep Learning
 - Developed a deep learning system for automated detection of White Spot Disease in shrimp using image analysis.
 - Built a hybrid ResNet50 and LSTM model with data cleaning, normalization, augmentation, and dataset balancing.
 - Achieved 89.5% accuracy and integrated the model into a real-time interface.

EXPERIENCE

- **Cybersecurity Trainee**
CyberGurukul Jan 2026 – Jun 2026
 - Completed training in cybersecurity fundamentals, network security, authentication, and access control.
 - Gained hands-on exposure to IAM concepts including RBAC, MFA, SSO, and access governance.
 - Worked with Okta and SailPoint for identity management, access provisioning, and governance.

CERTIFICATES

AWS Academy Graduate – Introduction to Cloud (Semester 1) [Credential Link](#)
Agentic AI – DeepLearning.AI [Credential Link](#)
Multi AI Agent Systems with CrewAI – CrewAI [Credential Link](#)
